Recap: Telefónica Deutschland's way forward

Strong set of results in 2019; making major progress towards our vision of becoming Germany's Mobile Customer & Digital Champion by 2022

Revenue acceleration continues and profitability solid

¹ Excluding the negative impact from regulatory changes (mainly driven by the mobile termination rate cut to EURc 0.95 per minute as of 1 Dec 2018)

² Mobile service revenue include base fees and fees paid by our customers for the usage of voice, sms and mobile data services. Also, access and interconnection fees as well as other charges levied on our partners for the use of our network are included

³ Exceptional effects were EUR 23 million of restructuring expenses in the period January to December 2019 (EUR 52 million based on IAS 17). The difference between restructuring charges under IAS 17 and IFRS 16 is due to the fact that certain IAS 17 operating lease commitments require the recognition of provisions, whereas those are recognised as lease liabilities under IFRS 16. Regulatory effects amounted to EUR -38 million in the period January to December 2019

⁴ CapEx excluding additions from capitalised right-of-use assets (as of 1 January 2019) and excluding additions from capitalised finance leases (till 31 December 2018)

FY 2019 guidance met across all metrics on sustained commercial momentum; aiming to accelerate growth profile leveraging a smart investment profile
