

# RCS Business Messaging

The new standard  
in customer engagement

## What is RBM?

**RCS Business Messaging (RBM)** is the business solution for brands to interact in a secure and trusted way with their end customers. It is based on the 5G GSMA messaging standard RCS (Rich Business Messaging) and works via the native inbox, with no requirement to download external applications.

[Here is the video](#)

## Offers bi-directional, multimedia and secure communication between users and brands

### Product features at a glance:

**Your brand as sender**  
Easily identifiable to build trust with recipients

**Carousel**  
Easy option to swipe left / right through products and topics

**Trackable actions**  
Tracked customer responses provide sophisticated analysis and measurable KPIs

**Verified sender**  
Users can trust the channel and brand through upfront MNO verification

**Customisable look & feel**  
Colours and brand logo ensure recognition

**Action buttons**  
Clear call to action buttons increase campaign success and user experience

## RBM enables multiple use cases in the digital customer journey

### Marketing

Interact with your audience and increase your open rate in comparison to other channels by

**over +200 %**

### E-commerce
