1 Please note a change in the definition of the fixed retail/wholesale split, which better reflects revenue allocation across segments

- MSR trends sequentially improving, both in reported terms and excl. regulatory effects
- Stable trend for partner share of postpaid MSR
- Handset revenue stabilising in a saturated market with continued longer replacement cycles from customers
OIBDA reflects successful synergy capture and investment activities

Structure of OIBDA for January to June 2017 (in EUR m)

- Successful synergy capture with incremental savings of approx. EUR 40 million in Q2 from FTE restructuring and network consolidation
- Market focus on promotional activities with larger data buckets drives commercial costs; continued investments into O₂ Free
- OIBDA margin at 24.6%, up 1.8 pp y-o-y

Excluding the extraordinary gain related with the sales of tower assets to Telxius in Q2 2016

1 Exceptional effects include restructuring costs as well as the net capital gain from the sale of Telefónica Deutschland’s passive tower infrastructure in April 2016. We have calculated a pro-forma OIBDA of EUR 1,793m for 2016, which includes the operating lease-related effects related with the before mentioned sale of assets as if it had occurred on 1 January 2016.
