 - the national emergency telephone number 110,
 - 112 calls as normal emergency calls and the eCall (only for 2G) variant.
2. Emergency calls to 110 or 112 via VoWifi are not possible.
3. Regarding the technical parameters for access to emergency services and for the transmission of caller location information and caller ID to the most appropriate PSAP, reference is made to the Technical Guideline for emergency calls as published by the Federal Network Agency for Electricity, Gas, Telecommunications, Post and Railways ("TR Notruf"; current version of 02.05.2018 available at <https://bundesnetzagentur.de>), which **<Telefonica Germany>** implements as far as applicable unless stated otherwise in this Annex.
 - **<Telefonica Germany>** supports voice emergency calls.
 - Fax support is not provided.
 - Emergency calls with Realtime-Text (RTT) are supported in **<Telefonica Germany>** network, but restrictions on PSAP side may apply such that an automatic fallback to a voice-only call occurs.

Location information is determined by **<Telefonica Germany>**'s network for its own customers and inbound roamers autonomously and will be transmitted to the PSAP. No intervention of **<Party B (HPLMN)>** is necessary in this regard. Location is determined by the network at call setup and will not be updated during the call. Transmission of optional handset- or user-derived location information is principally supported as long as the User Equipment adheres to the relevant standards as laid down in the "TR Notruf" and size limits are not exceeded. Furthermore, the PSAP must have the technical capabilities for displaying this information, which is not always the case.

Advanced-Mobile-Location (AML) support is available in the Telefonica network but requires active support of **<Party B (HPLMN)>** to route an originating AML-SMS to the Germany AML server. AML shortcode for Germany is 72438.

Note: Whether a roaming terminal supports AML service in the VPLMN is outside of **<Telefonica Germany>** control.

The involvement of **<Party B (HPLMN)>** in emergency call routing and transmission and in determining the emergency caller's location is neither required nor possible.

Cell broadcast is available. Cell broadcast does not work on all mobile device models. The Federal Office of Civil Protection and Disaster Assistance (Bundesamt für Bevölkerungsschutz und Katastrophenhilfe, BBK) is solely responsible for the content

of warning messages. **<Telefonica Germany>** merely provides the network infrastructure and is not the creator nor sender of the messages.

The national emergency call number 110 (police) is typically not recognized as emergency number by the roaming handset if standard settings are applied. It is thus required that the roaming handset supports the optional emergency number list and associated emergency categories as sent to the handset during network attach procedures.

In case of VoLTE-Roaming or other packet-switched voice calls with home-routing to the **<Party B (HPLMN)>**, it is also required that the handset and **<Party B (HPLMN)>** support the procedures to direct the handset into an appropriate emergency call procedure, as defined in GSMA recommendation IR.92 including Annex A, GSMA IR.65 section 2.9, GSMA NG.114, section 7.3 and Annex H of 3GPP TS 23.167 and 3GPP TS 24.229.

4. The Federal Network Agency commissioned a service provider to provide a relay service available at all times for deaf and hearing-impaired end-users which, to the best of our knowledge, also supports emergency calls, however possibly subject to a prior registration. Further information is available at the web site of the Federal Network Agency (<https://bundesnetzagentur.de>).
